Benefits & Features

Features

Corporate SMS provides you lot of features in many ways:

1. User & Group Maintainance

Corporate SMS provides you facilities of maintaining group and user's information that helps you to send group sms and maintained your company and personal user's information. Company admin can create many groups and can categorize every user into them, and that allow him to send group sms by Group ID.

2. Group SMS

Corporate SMS provides you facilities to send Group SMS in many ways e.g., By Location, By Department, By Designation and By Group ID. You can send sms to all users or selective users at one go by just selecting the type of Group SMS.

3. Instant SMS

Corporate SMS provides you the INSTANT SMS facilities at one go. Just enter the receiver mobile number (if multiple separated by comma (,)) and enter the message.

4. MIS (SMS Log)

Corporate SMS provides you the facilities to generate MIS or give you control to check the outgoing sms log. Company Admin has the facility to check all the outgoing sms log of his company id and Company user can only view by his sending sms log.

5. Location, Department & User Type Maintenance

Corporate sms provides you the facility to maintain Location, Department and User Type (Designation) of your company. Using corporate sms, company admin can create new location and can categorize user into them same wise he can also create department and user type (designation). He can also modify and delete any of these from his company account. By modifying or deletion, users will be automatically affected with new changes

6. Alpha-Numeric Sender

Corporate sms provides you the facility to set a alpha-numeric sender name while sending sms.
